Team 1: Riley Robertson, Jake Koontz, Walter Jacquette, Kyle Brown, Jeremy Putnam, and Eric Thiem

Defect Log

Defect #	Description	Severity	Type of Higher Order Testing	Test Case # or Description
1	If you know someone else's username, all you have to do is type that username in and you now have full access to someone else's calendar	1	Security	Switch Database User 003
2	When changing the size of the calendar application, the buttons on the side disappear and turn into …	3	Usability Testing	Switch Database User 004
3	When you add an event with a really long title and lots of events, the sizing of the app gets off and you can no longer read the buttons	2	Usability Testing	Switch Database User 004
4	Event alerts continue to spawn after exiting the program	1	Usability	Disable Notifications 001
5	The same default calendar is initially loaded for every user	3	Security	Switch Database User 001
6	Adding an event by clicking a day in the monthly view and clicking the "Add Event" button creates only a generic event with no title starting at the current time	2	Facility	Create Event 001 but from the daily view
7	If multiple events have the same name or no name, notifications do not distinguish between them	3	Usability	Change Notifications 002
8	Closing an event does not reopen the daily view box	3	Usability	Click on a day in the Calendar view which has events. Then click on an event and then close it. The daily view does not reopen
9	When changing the size of the calendar, there is no minimum size limit and the calendar can completely disappear	3	Usability	Switch Database User 004
10	There is no way to see the username of the account currently logged in	2	Security	Sign in to any account and try to view username
11	No information is filled in when a preset is selected so the user cannot see what is supposed to be in each input.	2	Usability	Preset Exam/HW/etc 001

12	The suggest button gives no indication of what it will affect or what will determine the suggestion.	3	Usability	Click on the the create event and click on the suggest button.
13				
14	The priority feature is never explained and gives no indication of how it will order different events with different priorities	3	Usability	Clicking on create event or any active event and changing priority
15	If more than 4 events exist for a particular day and a user utilizes the function of clicking on a date and selecting "Add Event", the new empty event will not appear immediately visible and no notification is given for the event's creation	3	Usability	Clicking on a day and selecting Add Event
16	If the last day you selected has unfinished events, you will receive notifications for those events ending even if today is not that day.	3	Usability	Selecting a day and waiting
